Attn: Hiring Manager

Recently a few employees from Insight gave a presentation to my cohort at WCCI. Amy Bedinghaus, Nick Martin and Corrin Kocher were all fantastic and I was immediately won over by their diverse backgrounds and professionalism. My impression is that Insight cultivates a dynamic and supportive working environment which is ideal for a new programmer.

As a support engineer with one year of diverse programming, data analysis and support experience, I am applying for an available junior programmer position. Attached you'll find my resume and a brief description of my qualifications.

I am a recent graduate of WCCI's software engineer program. Prior to this, I have one year of experience as a support engineer at a startup in Boston. I am an independent problem-solver and self-motivated learner with an ability to adapt to new processes, development environments, frameworks and APIs.

As a practitioner of agile methodologies, I believe a direct relationship with clients has helped me build a tenacious work ethic. I am enthusiastic when building software solutions that help my organization achieve its goals and meet the demands of its stakeholders.

I look forward to speaking with you in further detail about any open position and opportunity with Insight.

Sincerely,
Brad Weir
